

# European Data Management Workshop

*7<sup>th</sup> July 2022*

**How to expand the GROOM RI data management capacity to the  
“new” data type collected by Gliders in Europe?**

These projects have received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 951842 and No 862828

- Bring the European glider data management community together to discuss collectively of relevant DM topics.
- Week 1 : Where do we want to be in 2 years time ?
  - Communicate on the status of the EU glider data management
  - Identify issues and bottlenecks in the real time data flow
  - Collect requirements from the community to support the real time data management.
  - Identify the data management services GROOM II could provide for the EU glider community... and beyond.
- Week 2 : Where do we want be in 5 years ?
  - Think collectively the evolution of the data management infrastructure of the GROOM RI to reach sustainability, adaptability and efficiency.
  - Anticipate the evolution of the data collection capacity of the gliders

## Overall meeting objectives

### Audience and moderators

- Name yourself with you name and institution
- Audience should turn off their microphone
- Audience should raise their hand to speak
- Moderator should manage timing and distribute the microphone according to the order of hand raised

The meeting is/will be recorded

Presenter can share their slide in the chat or through email to [vturpin@ocean\\_ops.org](mailto:vturpin@ocean_ops.org)

Slides and notes will be available on GitHub:

[https://github.com/OceanGlidersCommunity/meeting\\_notes](https://github.com/OceanGlidersCommunity/meeting_notes)

Do not hesitate to contribute to the live notes : <https://hackmd.io/wc5cIVLLT-SCmvPNHwmhdg?both>

## Overall meeting objectives

# Agenda

- 🔗 Ground rules and introduction (Victor Turpin - OceanOPS) – 10 min
- 🔗 Overview of the new capacities (50 min)
  - 🔗 *The BioGlider project (Laurent Mortier - ENSTAParistech)*
  - 🔗 *Echo sounder : EK80 (Yves Ponçon - LOCEAN)*
  - 🔗 *Underwater vision Profiler : UVP6 (Marc Picheral – LOV)*
  - 🔗 *Carbon measurements by gliders*
  - 🔗 *Passive Accoustic Monitoring*
- 🔗 Discussion (Alvaro Lorenzo-Lopez) – 1h

# Agenda

 Discussion (Alvaro Lorenzo-Lopez) – 1h

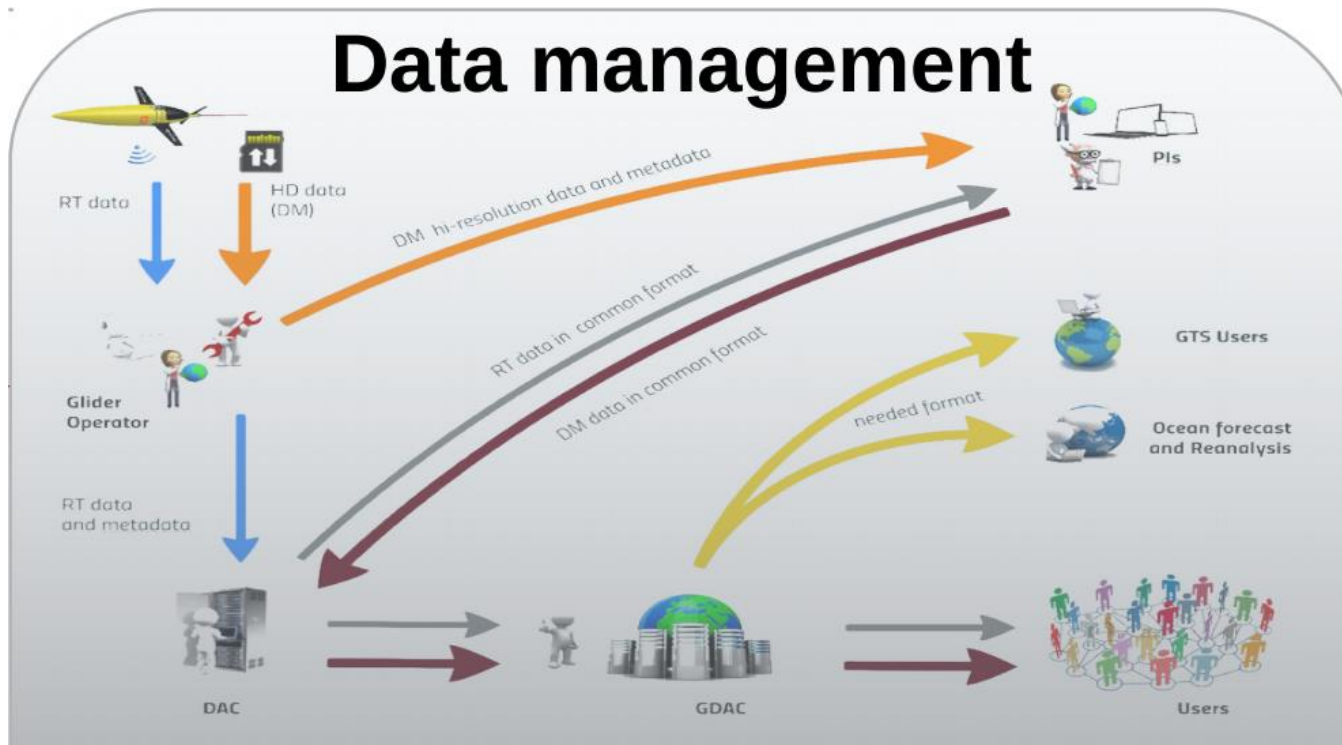

- Is the concept of DAC or GDAC appropriate for the new emerging datasets?
- What should be the role of GROOM RI regarding these new data types.
- What should be the role of GROOM RI in the European Data Infrastructure Landscape.
- Near Real Time Data (from MAS). Can we do more with a dedicated infrastructure?.
- Managing New datasets in delayed/recovery mode. What are the challenges?

Padlet board: <https://padlet.com/alvarolorenzonoc/as89sbmo9y3iyfld>

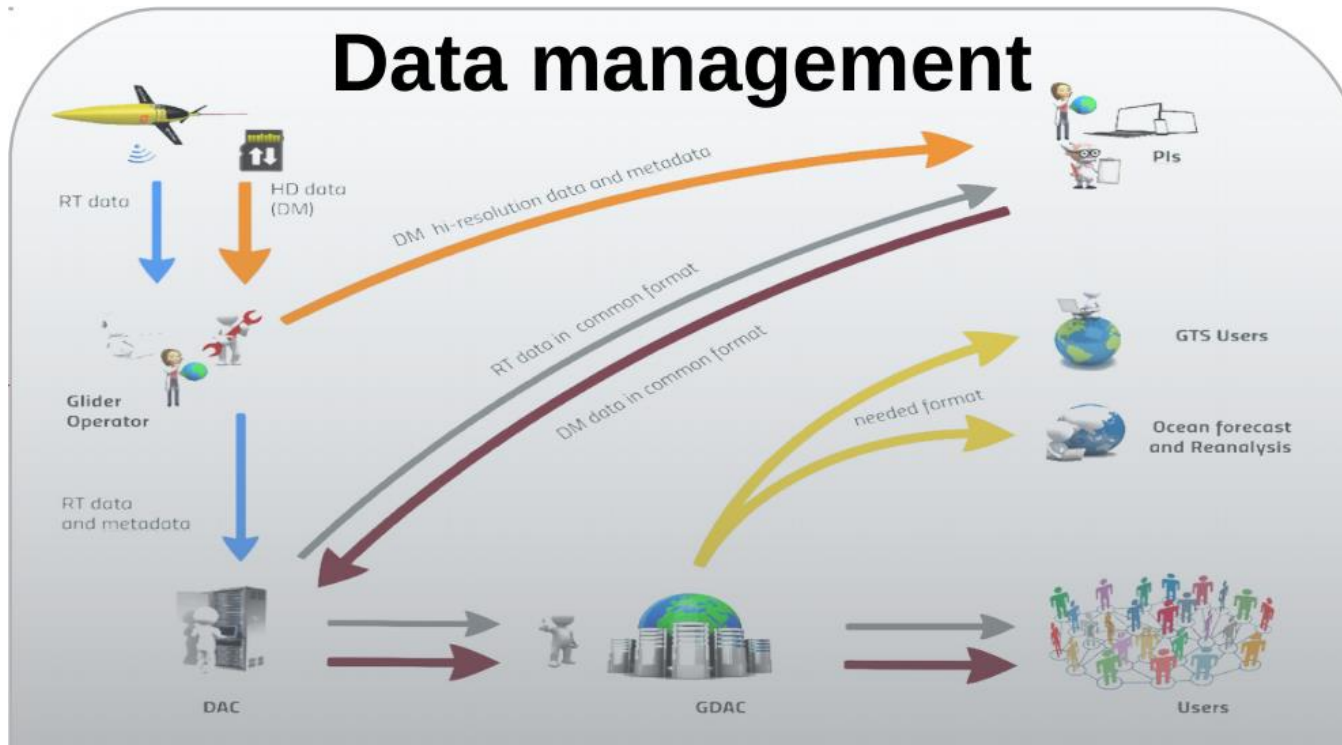

- Highlight the expanding sampling capacity of gliders and its impact on data management.
- Anticipate the needs for the GROOM RI data management infrastructure to be able to ingest, distribute and manage these new types of data.
- Provide elements to complete the data management road map for the GROOM RI in the light of the expanding sampling capacity of gliders.

## **Objectives of the session**

**Current “theoretical” glider data flow in Europe.**

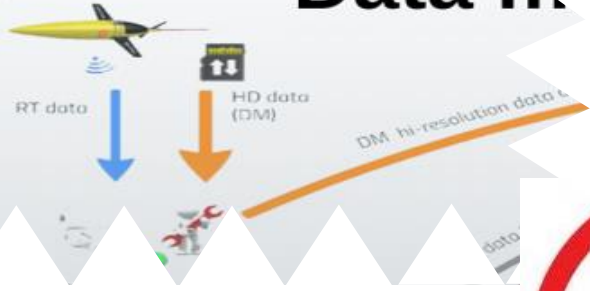

**Current “theoretical” glider data flow in Europe.**

## Data management

## Management

Current “theoretical” glider data flow in Europe.
